The Latest Pro Tools

Pro Tools 2020.11

The latest version of Pro Tools brings new features for music production, including Audio-to-MIDI capability and support for

Pro Tools | Carbon and the Hybrid Engine. It introduces an inspiring Dark theme. And it delivers an integration that lets you export ADM files for Dolby Atmos®, right from Pro Tools. Quickly turn audio files into MIDI notation with a simple drag and drop, so you can re-pitch notes, play with the timing, revoice instruments, or jump-start new creative ideas. Get support for the new Pro Tools | Carbon interface, which integrates with Pro Tools intelligently, enabling you to offload real-time AAX DSP plugins to Pro Tools | Carbon at the touch of a button. Dark theme is a new dramatic look for Pro Tools. Switch it on and the UI transforms into a sleek, modern working environment. And it's a theme that pairs well with Pro Tools | Carbon, too. Save tons of time with the Space Clips command, which separates and spaces multiple clips on a track at equal time intervals of your choosing. For game sound creators, it greatly speeds up your workflow. For audio post pros working with Dolby Atmos, you can now import and export ADM files directly from Pro Tools, eliminating the extra step of exporting from the Dolby Atmos® Renderer.

Studio One 5

Studio One is the only DAW that lets you record, produce, compose, mix, master, publish, and perform from a single intuitive interface – and its drag-and-drop workflow will supercharge your creativity. While Studio One is loaded with world-class virtual instruments and effects that keep your imagination flowing, it's also a robust creative tool for songwriters and arrangers thanks to its Chord Track and Harmonic Editing, allowing you to quickly audition new harmony and chord structures in Instrument Tracks and even Audio Tracks. The built-in Project Page handles all of your mastering needs, and when your EP or podcast is done, you can publish directly to SoundCloud without leaving the application. When it comes time to perform and support your record, use Studio One's new Show Page live on-stage to leverage your studio tracks as backing tracks; play virtual instruments live; use the third-generation Ampire live to re-create your studio guitar tones; and Studio One Native Effects to process your live vocals. You can even create and rearrange your entire setlist, show after show. All from Studio One.

Apogee

Clearmountain's Domain

Perpetual License Download

For decades, engineers, producers, and musicians have marveled at Bob Clearmountain's mixes. Clearmountain's ability to build a soundscape and atmosphere, where voices and instruments effortlessly live in an intimate space but seamlessly blend together, set new standards for mixing. His passion to reveal the true character of the song, highlighting the emotion of the music, gets to the heart of what inspired the song from its inception.

Apogee's Clearmountain's Domain plugin reproduces Clearmountain's personalized FX signal chain for creating the cohesive spaces, expansive dimensions, and rich atmospheres where his mixes live. Classic presets help you to recreate the sonic environment of your favorite Clearmountain mixes. Advanced views reveal Bob's decades to expertise and empower you to create your own musical mix domain.

Avid

Pro Tools Carbon

Hybrid Audio Production System

For artists, brands, and producers, Pro Tools | Carbon is a new breed of audio interface – built to capture brilliance. It’s a hybrid audio production system that features incredible sound quality and combines the power of your native CPU with onboard HDX DSP acceleration. So you can push your computer to the limit when you mix and record through AAX DSP plugins with near-zero latency monitoring. All at the touch of a button. All in Pro Tools.

For artists, bands, producers, and engineers, Pro Tools | Carbon is the most inspiring audio interface Avid has ever made. This new hybrid audio production system works intelligently together with Pro Tools, putting power at your fingertips to record with AAX DSP plugins and monitor performances in real time – without any audible delay. Pristine converters, double resolution clocking, and our most transparent mic preamp design yet ensure that every detail of every performance is captured with the utmost clarity. With plenty of headroom to fully optimize your mix. And with 25 x 34 simultaneous ins and outs, including four headphone outs to handle cue mixes, you have all the connections you need to capture the best performances, from solo artists to an entire band. With HDX DSP acceleration under its hood, Carbon has the power to keep pace with your imagination. Intelligently integrated with Pro Tools, it lets you push your CPU to the limit when working with virtual instruments and mixing. Then tap into turbocharged performance at the touch of a button to record through AAX DSP plugins in real time – with near-zero latency monitoring. Without ever leaving Pro Tools. So, say goodbye to third-party apps and put all your focus on the music you’re making—not what you’re making it with. Every aspect of Carbon is engineered in pursuit of sonic excellence. Superior audio conversion. Double resolution clocking. And our most transparent preamp design ever. All details have been meticulously considered, so that every nuance of every performance is captured with the greatest depth, dimension, and clarity. All you have to do is press record.

With 25 x 24 simultaneous I/O, Carbon is ready to record any session—from a solo artist to full bands. Eight pristine preamps, four headphone outputs, and 16 channels of ADAT I/O open up with creative possibilities for miking, cue mixing, and expansion. Plus, its super-fast, high-bandwidth Ethernet connection not only preserves the highest possible sound quality from input to output, it’s designed to support future workflow enhancements too.

00361151.....MSRP/MAP \$3999.00

Pro Tools MTRX Studio

Your Studio Centerpiece

Get the quality, flexibility, and creative efficiencies of Pro Tools| MTRX, optimized for mid-size music and audio post production. Pro Tools | MTRX Studio delivers high-quality I/O, extensive routing possibilities, and premium monitoring all in one audio interface. Declutter your studio by connecting all your gear to a single 1U device. Route any input to any output. Customize monitor profiles with integrated speaker tuning for any setup. And outfit sound design, sound editing, and smaller mix rooms for Dolby Atmos, enabling immersive mixing decisions to take place at any point in the post-production process.

For Music Creation and Mixing Professionals (Engineer, Studio, Creator)

For music creators and engineers, the ultimate objective is to stay in the creative moment while having efficient, ready-access to outboard tools and the highest audio quality. Pro Tools | MTRX Studio leverages the multifunction qualities of Pro Tools | MTRX in a more compact yet fully loaded interface. It features precision AD/DA conversion by Digital Audio Denmark, premium mic preamps, and tight integration with Pro Tools | HDX and HD Native, enabling you to record with the lowest latency and monitor every vocal and instrument detail to create better sounding music. And with its powerful digital routing capabilities and ample analog and digital I/O, including Dante, you can connect all your gear to a single interface, providing great studio efficiency in a small footprint. For Audio Post and Mixing Professionals (Sound Designer, Engineer, Facility)

From recording sounds, ADR, and Foley, to mixing immersive audio, sound designers, editors, and mixers need high-quality, efficient solutions to support their demanding workflows. Pro Tools | MTRX Studio delivers the powerful routing and monitoring capabilities of Pro Tools | MTRX in a more compact yet fully loaded interface. It features precision AD/DA conversion by Digital Audio Denmark and premium mic preamps to create high quality sound, while Dante connectivity makes routing audio to multiple devices and rooms easy. With flexible monitor control and built-in SPQ speaker calibration, you can work with any speaker format and ensure your monitoring environment is precision-tuned. Outfit sound design, sound editing, and other mix rooms for Dolby Atmos, enabling creative immersive mixing to take place at any point in the post-production process.

Pro Tools | MTRX Studio is a versatile all-in-one I/O, monitoring, and routing solution that packs immense function in a compact form, consolidating multiple devices in your signal chain. From recording and monitoring, to routing audio across multiple rooms and devices, tuning speakers, creating monitor profiles, and folding down mixes, it’s the ideal centerpiece for

AudioBox – 25th Anniversary Editions

AudioBox USB 96

2x2 USB 2.0 Recording System

Whether you are a musician, producer, or podcaster on a tight budget, the AudioBox USB 96 is for you! This simple, handy little recording interface has just the right features for basic recording needs, allowing you to plug in and start recording up to 24-bit, 96 kHz audio right away. Bus-powered and built to travel, the AudioBox USB 96 makes recording easy.

The two front-panel combo mic/instrument inputs make it ideal for singer/songwriters, podcasters, and guitar or guitar-bass collaborations. Simply connect a couple of mics and you have an easy-to-use stereo recording system. A mix control lets you control the level between the input signal and computer playback, without hearing annoying delays. You also get a pair of balanced line-level outputs, an ultra-loud, crystal-clear headphone out, plus MIDI I/O, so you can connect your favorite synth or MIDI controller. The result is a simple, affordable, mobile recording solution.

This is a Micro SD with an adapter so it works with all TASCAM HandHelds, Portastudios and Models 16/12/24.

00346622..... \$17.99

US-4x4

4-In/4-Out Audio/MIDI Interface with

HDDA Mic Preamps and iOS Compatibility

The TASCAM US-4x4 combines great audio quality and ergonomic design for a powerful 4-in/4-out USB 2 audio interface. Four Ultra-HDDA mic/line preamps provide up to 57dB of gain with nearly inaudible noise and distortion specs. The audio design features high-performance, musical components like NE5532 op amps for rich sound quality without coloring the source.

Features include:

- Audio buffer size selectable up from 4 samples
- Software window size optimization enabled by HiDPI support
- "Auto Driver Select" function enables/disables default device settings
- Up to 96kHz/24-bit recording
- +48V phantom power for all inputs
- Two switchable high-impedance inputs
- Direct monitoring function for zero-latency monitoring
- Balanced analog TRS output jacks suitable for connection to powered monitors
- Standard TRS headphones output jack
- Separate controls for line and headphones output volumes

TASCAM

US-16x08

USB Audio/MIDI Interface

The TASCAM US-16x08 captures 16 mic and line inputs to your computer with clear sound quality and advanced features to manage big sessions. Eight Ultra-HDDA microphone preamps deliver the cleanest and quietest operation in their class, while delivering up to 56dB of gain. An additional eight line inputs are provided, two of them switchable to instrument level for direct guitar or bass recording. Eight balanced line outputs are also available, two with a level control on the front panel for monitoring.

Features include:

- Ultra-HDDA (High Definition Discrete Architecture) mic preamps with -125dBu EIN
- Standalone mode for use as an independent mic preamp
- Up to 96kHz/24-bit recording
- +48V phantom power available for all microphone inputs
- Separate controls for line and headphones output volumes
- Low-latency monitoring via on-board DSP mixer
- DSP mixer with 4-band EQ and compression on each input channel
- Digital Patch bay allows outputs to be assigned freely

PRESONUS / SAMSON / TASCAM

PreSonus

Eris Sub8

Compact Studio Subwoofer

The single best subwoofer you can get to put a little boom in your room, the Eris Sub8 is the first subwoofer to join the lauded and best-selling Eris studio monitor line. We called it Eris because it's been designed from the ground up to be part of the family; it complements the voicing and frequency response of the modern Eris classics. The surprisingly loud 100-Watt Eris Sub8 drops down to a molar-rattling 30Hz, allowing you to both rock harder and produce better mixes, as you'll be hearing an accurate representation of your work. Thanks to robust configuration and I/O, you'll be able to tailor your Eris Sub8 configuration exactly to your mixing and listening needs. You can connect your existing monitors via 1/4-inch TRS or RCA, set the input level to your liking, and even invert the polarity. Most importantly, you get a High Pass Filter and a Low Pass Crossover control that ensures your Sub8 starts working at the precise low-frequency point where your main monitors stop working. This makes sure you avoid the flubbery, smudged, low-end mess that one hears in redundant, duplicate, redundant bass reproduction that occurs without a crossover.

Features include:

- 8-inch, front-firing, paper-composite low-frequency transducer with high-elasticity rubber surround
- Class AB amplifier: 100W peak (50W RMS) power
- Input gain control (-30 dB to +6 dB, continuously variable)
- Continuously variable lowpass filter (50 Hz to 130 Hz)
- Defeatable highpass filter removes frequency content below 80 Hz from the full-range signal sent from the Eris Sub8 outputs to the main speakers
- Left and right, balanced 1/4-inch TRS and unbalanced RCA main inputs
- Left and right balanced 1/4-inch TRS and unbalanced RCA pass-through outputs for connecting satellite speakers
- Polarity invert switch
- Protection: RF interference, Output-current limiting, Over-temperature, Turn-on/off transient, Subsonic filter, External mains fuse

00357960..... MSRP \$259.95 • MAP \$199.95

Eris E7 XT

2-Way Active Studio Monitors with Wave Guide

With their smooth, accurate frequency response; powerful amplification with tons of headroom; and acoustic tuning functions that ensure you always get the

best sound – it's no wonder that the original Eris series studio monitors have been a runaway hit since their introduction. The Eris E7 XT builds on the Eris XT-series adding big, controlled bass in a compact form that will fit into a studio of nearly any size. Deep lows and a wide, more controlled sweet spot (thanks to its EBM wave-guide design) mean that our best-selling studio monitors just got even better.

We outfitted the Eris XT studio monitors with a new EBM (Elliptical Boundary Modeled) wave-guide designed by none other than Hugh Sarvis of WorxAudio, the mind behind our award-winning CDL loudspeakers and lauded R-Series monitors. The result? A superior high-frequency response and wider 100-degree horizontal dispersion to create a broader sweet spot. It's ideal for group listening and collaboration – while narrow vertical dispersion reduces reflections from your desk. Silk-dome tweeters ensure snappy, accurate transient reproduction.

00347629..... MSRP \$299.95 • MAP \$229.95

ISPD-4

Acoustic Isolation Pads for Studio Monitors

These inexpensive foam pads isolate your speakers from their supporting surface, reducing vibration and improving clarity and midrange resolution. Sold in pairs, each PreSonus ISPD-4 isolation pad can be divided into halves and configured in several ways so you can use them with virtually any near-field studio monitors. For small, vertically placed speakers, use half of an isolator per side or employ the full pad, whichever works best. Place two half-pads side-by-side to accommodate larger speakers or horizontal placement.

00354328..... MSRP \$49.95 • MAP \$29.95

Samson

SR990

Closed-Back Studio Reference Headphones

The Samson SR990 Headphones have been meticulously designed to provide an accurate and balanced audio image for music enthusiasts and professionals alike. Ideal for mixing, critical listening, and music playback, the SR990 headphones offer an extended frequency range with a detailed bass response and ultra-clear highs. Equipped with 50mm neodymium high-sensitivity drivers, the SR990 headphones offer exceptional sound quality and clarity so you can mix with confidence. A wide 20Hz–20KHz frequency response allows listeners to hear audio the way it was intended to be heard with a clear dedication to audio accuracy and maintaining a true and natural sound. Listen in comfort on the go or at the studio with the closed-back design that provides ample sound isolation with minimal bleed. The SR990 headphones feature a durable and ergonomic design with a wide, self-adjusting headband and velour earpads for a secure fit and extra-comfortable marathon listening sessions. Headphones include a 1/8-inch-1/4-inch gold-plated adapter and a set of velour and high-protein earpads.

Q9U

DYNAMIC BROADCAST MICROPHONE
Achieve studio-quality audio for broadcasting, podcasting, streaming and recordings with the Q9U. Easily integrated into any professional or home recording studio, the Q9U features

both an XLR output and USB-C connection with stunning 24-bit/96kHz resolution. The cardioid polar pattern rejects off-axis sound focuses the pickup in front of the microphone. A wide frequency response and large dynamic range ensures the detail and nuance of the voice are captured for a natural sounding performance. An internal air-pneumatic shockmount and dual-layer wind-screen minimizes popping, plosives and mechanical noise. The Q9U also includes zero-latency headphone monitoring, onboard mute switch, and seamless plug-and-play connection with Mac and Windows computers.

Yeti Pro

Ultra High Resolution USB & XLR Microphone
From the best-selling Yeti USB microphone family comes Yeti Pro - the first condenser microphone that captures ultra-high resolution 24-bit/192kHz digital recordings on your desktop, and connects to professional recording equipment in the studio. Featuring three custom condenser capsules and four different pattern settings [cardioid, omni-directional, stereo, bi-directional], Yeti Pro delivers

detailed audio that's more than four times higher resolution than a CD - during any recording scenario. Whether you record at home, in a studio, or in the Himalayas, Yeti Pro combines the convenience of USB microphones with the flexibility of XLR microphones.

The proprietary capsule design delivers rich, detailed sound, while the premium A-D converter enables high-resolution 24-bit/192kHz audio recording direct to your computer. The Yeti Pro also features an adjustable design so you can find the optimal mic placement. Whether you're producing podcasts, voice overs and Twitch streaming, or recording audio for your latest music project, Yeti Pro will carry your projects to great heights!

MXL Microphones Individual Microphones

AC-44

USB Condenser Boundary Mic

With a compact footprint, the MXL AC-44 is an ideal solution for any application

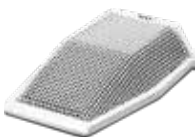

that requires high-quality sound capture, including web conferencing, telemedicine, huddle spaces, classrooms and more. Offering crystal clear speech intelligibility, the AC-44 removes the barriers that unclear audio creates.

The AC-44 uses MXL's signature 3-capsule boundary design to enhance direct sounds while mitigating noise and echoes in any workspace. The microphone's wide 180-degree cardioid pickup pattern provides excellent pickup, focusing on sound sources in front of the microphone and eliminating unwanted noise from the back. This gives the AC-44 flexibility between working in a single-user workspace, in a medium huddle space or even in classrooms and medical facilities.

Features include:

- Three capsules designed for a wide pickup arc with high voice intelligibility with sound rejection from the back
- Easy plug-and-play connectivity for use with Mac and PC computers
- Available in white, black, and cobalt
- Ideal for telecommunication
- Professional low profile design with durable all metal construction

AC-404

USB-Powered Microphone

Part of the ProCon series, the AC-404 USB is a high quality capsule micro-

phone that dramatically improves voice quality on conference calls. Ideal for people who rely on free or subscription internet conferencing services such as Skype, the AC-404 conference mic uses boundary microphone technology and built-in custom circuitry to produce smooth, quiet, and professional sounding conferences, no matter where you are.

Features include:

- High-quality USB boundary mic for Web conferencing
- Excellent for offices and conference rooms
- Standard jack for headphones or speakers
- 180-degree coverage for great sound over a wide range
- Compatible with any computer (Mac or PC)

AC-404 LED

USB Boundary Microphone with Color-Changing LED Base

Modernize the look and feel of your conference room, huddle space or gaming rig with the MXL AC-404 LED. High performance 3-capsule microphone design captures crystal clear speech intelligibility. The wide pickup pattern and 25-Foot range allow high fidelity, even in a group setting. Personalize the AC-404-LED's glowing base with 8 preset color modes to match your computer equipment, logo, or room decor. The AC-404-LED easily connects via USB for web conferencing, gaming, and more.

Features include:

- Three capsule design for broad 25' audio pickup with clear voice intelligibility
- 8 preset color modes offer a wide range of customizable options: White, Yellow, Red, Green, Blue, Purple, Magenta, and Auto-blend
- Easy USB connectivity for use with Mac and Windows
- Rugged, modern design with all-metal body construction
- 3.5 mm analog output for headphones
- USB Powered, no additional batteries required

V87

Low-Noise Pro Studio Condenser Microphone

The MXL V87 is a large diaphragm, low noise FET condenser microphone that absolutely shines in the mid to upper range registers. With an outstanding mix of smoothness and clarity, coupled with a low proximity effect, the V87 is perfectly suited for up-close vocal recordings. It's low-noise, transformerless output also make it an excellent choice for detailed stringed instruments and piano recordings. V87's sound quality and solid construction make this a valuable addition to your microphone collection.

Features include:

- Large diaphragm for a wide frequency response
- Outstanding mix of smoothness and clarity
- Very low proximity effect; great for up-close recording
- Excellent for acoustic guitars and pianos
- Solid-state design for low noise and reliability

PreSonus

DM-7

Complete Drum Microphone Set for Recording and Live Sound

The PreSonus DM-7 drum mic set gives you everything you need to authentically capture your drum kit and just about any other instrument you like. Starting with the foundation, the BD-1 kick drum mic provides a mid-cut frequency response to emphasize both the boom and the attack of your kick drum for tight,

robust sound. The four ST-4 microphones will bring out the best in toms and snare drums while staying out of the drummer's way – thanks to the included, adjustable rim mounts. To capture the sizzle of your cymbals and the ambiance of the room, use the two OH-2 small-diaphragm condensers to add space and movement to your drums. With a useful assortment of microphones, included mounts, and a hardshell carrying case, the DM-7 drum microphone set is a single-purchase solution for any drummer, and a welcome addition to any producer or engineer's mic locker.

00357958..... MSRP \$399.95 • MAP \$299.95

PD-70

Dynamic Vocal Microphone for Broadcast, Podcasting, and Live Streaming

The PD-70 is built to capture spoken word cleanly and clearly while eliminating mechanical noise and breathiness that can get between you and your audience. With superior off-axis rejection, you can set up your broadcast studio in just about any space – and unwanted reverberance, electrical hum, and the random car driving by will be left behind, leaving only the pristine, natural sound of your voice.

00357959..... MSRP \$169.95 • MAP \$129.95

Revelator

USB-C Compatible Microphone with StudioLive Voice Effects Processing

Revelator is designed to deliver polished, professional-sounding results with ease. 16 easy-to-use, professionally-crafted presets and fully editable, award-winning StudioLive EQ and compression processing plus voice effects and reverb give you studio-quality sound with minimal effort. Revelator also provides three different polar patterns in one USB microphone to provide maximum flexibility.

Two stereo loopback channels make recording and mixing audio from multiple applications like Skype or Discord quick and easy. Built-in monitoring and an onboard headphone amplifier let you listen to your performance in real-time.

00361224..... MSRP \$249.95 • MAP \$179.95

Warm Audio

WA-47jr

FET Condenser Microphone

The WA-47jr FET offers one of the most coveted classic microphone capsule designs in an affordable microphone circuit. The WA-47jr FET uses a high quality discrete transformerless circuit with Toshiba FET's, Wima film capacitors, and Panasonic electrolytic capacitors. The WA-47jr FET brings the tone and character of the classic '47 style microphone to you through the most critical component (its capsule) and is able to maintain an aggressive price-point by simplifying the rest of the circuit topology. The WA-47jr FET's simplified circuit is in no way a low quality circuit but is simpler to build and uses less components than a vintage tube microphone, which allows us to offer it at such a bargain price. The WA-47jr FET uses the same capsule as the Warm Audio flagship WA-47 tube microphone and sounds wildly similar to the WA-47.

00362011 Black.....MSRP/MAP \$299.00

WA-47 Flight Case

Aluminum Hard Case for Microphone with Padded Interior

The WA-47 flight case provides safe housing for a WA-47 microphone system for travel or storage. Made out of aluminum for strength and low weight, the case's top lid is dressed in soft ribbed foam, while the main compartment features rubberized

foam that is precisely molded to hold all of the components of the WA-47 microphone system safely and securely.

00356580.....MSRP/MAP \$99.00

WA-67

Studio Microphone

The original '67 became one of the most sought-after and widely used studio microphones of its time, recording a massive collection of some of the most memorable songs of the last 50 years – we're talking about classic tracks from artists as varied as the Beatles, Led Zeppelin, the Temptations, and Nirvana! The original mics are still sought after, but they can command upwards of \$8000 for a pristine unit, putting them far out of reach for most recordists. Thankfully, Warm Audio has now changed that scenario with the release of the new WA-67! Based around an EF86 pentode tube and having the same smooth and creamy tone of the original, the WA-67

excels at recording just about anything that you put it in front of, and it may immediately become your go-to choice for vocals, guitars, drum toms and overheads, pianos, brass and strings.

00360085 Nickel.....MSRP/MAP \$899.00

WA-84

Omni Capsule

We are very pleased to announce that our WA-84 microphone family is expanding! Standalone omni capsules for the WA-84 are now available in both standard nickel and

black finishes, so adding omni capability to your existing WA-84 microphone is as easy as unscrewing your cardioid capsule and popping on the omni. Viva le wide pickup pattern!

00356548 Black.....MSRP/MAP \$99.00

00356547 Nickel.....MSRP/MAP \$99.00

WA-84 Stereo Pair

Includes Omni and Cardioid Capsules

This WA-84 Stereo Pair with Omni and Cardioid Capsules package contains 4 custom vintage-style capsules that emulate classic component design techniques. 2 of the capsules included are cardioid directional, and the other 2 are omni directional. The WA-84 capsules are carefully manufactured by an Australian capsule supplier and are precisely reproduced to vintage specifications. We are pleased to offer such high-quality capsules in this microphone package allowing us to nail

the sonics of the most important component to any microphone's sound.
00345598 Nickel.....MSRP/MAP \$899.00

WA-87 R2

FET Condenser Microphone

The new WA-87 R2 uses top-quality components like a NOS Fairchild transistor and high-bandwidth polystyrene and film capacitors from Wima. The WA-87 R2 uses a custom-wound Cinemag USA output transformer like the original WA-87 did, with the new version providing a slightly increased output level and improved frequency response. We also employed the same capsule the WA-87 uses, which was designed to the exact specifications of the ones found in the vintage mics.

The WA-87 R2 also features three polar patterns (cardioid, omni and figure 8) so you're covered for a wide variety of applications, and an 80Hz high pass filter reduces low-frequency rumble if needed. The switchable -10dB pad comes in handy when you want to record extremely loud sources and not overload the internal electronics. The WA-87 R2 works brilliantly on vocals, drum overheads, guitars, piano, auxiliary percussion, brass, strings and more. Not only that, it's the same price as the original WA-87, so you can afford to have several in your mic locker!

00357627 Black.....MSRP/MAP \$599.00

00357626 Nickel.....MSRP/MAP \$599.00

WA-251 Flight Case

Aluminum Hard Case for Microphone

The WA-251 flight case provides safe housing for a WA-251 microphone system for travel or storage. Made out of aluminum for strength and low weight, the case's top lid is dressed in soft ribbed foam, while the main compartment features rubberized

foam that is precisely molded to hold all of the components of the WA-251 microphone system safely and securely.

WA12 500 MkII

Discrete Mic Preamplifier

A lot of preamps on the market do a good job of raising the volume of mics and instruments. Unfortunately, many pres are doing only that, raising volume. The “super clean” designs of today often leave the signal exiting the preamp sounding much the same as it did entering it. If you are looking for a preamp to improve and shape your signal, you will most definitely love the WA12 500 MkII. It’s designed to transform plain instruments and vocals into exciting tone.

If your mixes lack depth, struggle to sound alive, or are just missing that professional touch you’ve always wanted, there is a good chance you will love the WA12 500 MkII.

Features include:

- Fully discrete design with a robust 71 dB of gain
- 6-pin socketed 1731 style op-amp
- 20 dB Pad
- External 24V AC power plug
- Tone button to switch the input impedance from 600 ohms to 150 ohms
- XLR mic level balanced input
- XLR and 1/4" TRS balanced outputs
- 48V Phantom power
- LED meter gain indication
- 2 Meg Ohm true Hi-Z input on front panel. Sends instrument signal through entire circuit including both cinemag transformers and discrete op-amp
- Output attenuation control (after the Cinemag output transformer) allows for driving the preamp and transformers into saturation

This unique wireless microphone solution is ideal for presenters, fitness instructors, educators and interviewers. This digital system operates on the 2.4GHz license-free frequency and offers professional full-range audio and 100' of wireless operation at an unbeatable value. Easily integrate the XPdM System into your audio setup with a lightweight and portable RXD1M receiver that has XLR, 1/4" and 1/8" outputs. Simply pair the handheld PXD1 transmitter to the receiver via the pair button for straightforward synching. These systems deliver high-quality audio using 2.4GHz digital transmission. This wireless technology allows the microphone transmitter to send an uncompressed signal to the receiver and offers a greater signal-to-noise when compared to traditional wireless systems.

XPdM Handheld

with Q6 Dynamic Mic

A Q6 neodymium mic element provides a wide dynamic range and a multi-axis, shockmounted capsule that minimizes handling noise for a reliable, professional sounding wireless mic.

00354875.....MSRP \$179.98 • MAP \$129.99

XPdM Headset

with DE5 Omnidirectional Mic

The DE5 Omnidirectional Headset Microphone is a unique double ear headset that is designed to hold the mic in place when the user is in motion. The omnidirectional pickup pattern captures vocals for a clear and articulate sound regardless of the position of the capsule to the sound source. Included is a clothing cable clip for inconspicuous and unobtrusive

cable placement as well as a windscreen to reduce wind noise and P-pops.

Electric Guitars

530P

Just the right amount of vintage magic makes the 530P the choice for those that are seeking a more traditional instrument. For this special edition, we started with an exotic Sungkai tonewood body and wrapped it in a Tobacco Sunburst Open Pore finish that delivers a more natural feel. This finish will preserve the natural acoustic properties of this tonewood while still providing excellent protection. The pickup configuration on the 530P guitars is vintage traditional. Well at least that is how it appears. Actually we

put an MK electronics mod on the 530P that we call the Quad Mod. As the name implies you get 4 great sonic options instead of the expected 3 options. The 530P has a 4 way switch and in that fourth switch position we give you both pickups in series. It is like having a nice fat humbucker as those two pickups work together. The 530P also has some nice and hot single-coil Rockfield's designed especially for this instrument. Traditional has never been more evolved.

Tobacco Burst Finish

*00347989.....MSRP \$589.99 • MAP \$399.99

540P

The 540P might be called the black sheep of the 1950's collection. It avoids tradition in favor of a bolder look and tone. You can't help but notice the Open Pore finish on this Sungkai bodied guitar that delivers a more natural feel. This finish will preserve the natural acoustic properties of the tonewood while still providing excellent protection. The powerful Rockfield® SWC humbucker can be coil-split via the push/pull tone knob to deliver single-coil tone. The fast and comfortable neck is enhanced

with a 10 inch radius on the premium Ebony fretboard. So eschew tradition with your own 540P.

* 00347988.....MSRP \$589.99 • MAP \$399.99

630P

Sleek, comfortable and sonically versatile, the 630P is the perfect guitar for the gigging musician. The Open Pore finish on this guitar provides a more natural feel. This finish will preserve the natural acoustic properties of this tonewood while still providing excellent protection. Put that with our trio of Rockfield® pickups found on all the 1963 models, complete with push/pull coil split on the tone knob for the humbucker, and you get a striking guitar with many tonal possibilities that is as much fun to play as it looks.

Faded Black Finish

Triple 50

With the Triple 50, we have broken away from the traditional setup of two single coil pickups and have added a third single coil pickup in between the normal bridge and neck pickups. We have also updated the Triple 50 with a wiring mod that is unique in that we still utilize the standard 3 way selector switch but have added an additional mini toggle switch that allows you to bring the middle single coil pickup in or out of your mix so that you get even more tonal options. The Triple 50 is one of the most versatile and tonally rich models within our 1950's line, and will quickly become your favorite go-to guitar.

59 Thinline

Includes P90 Pickups and "F" Holes

The 59 Thinline from Michael Kelly Guitars strikes all the right chords visually and sonically. The semi-hollow body design with accompanying f-hole gives this guitar a tone which is immediately coveted and recognizable. The Rockfield P90 pickups provide a detailed mid-range with a strong bass response for a warm and punchy tone. With the twang of a single coil and the powerful body of a semi hollow, the tone that resonates from the 59 Thinline is unique with a striking character.

Burl 60 Ultra

Double Cutaway Electric Guitar with Locking Tremolo System

Fun, versatile, smooth, and bold are some of the words that players have used to describe their take on the Ultra. The all-Korina body is lightweight but has a thick tone, akin to a fine piece of mahogany. The burl top/Korina body combination delivers articulate highs and lots of guts in the lows and mids. We modded the electronics to give you a little something extra. We equipped the Burl 60 Ultra with a Rockfield combination that remains our most-requested for traditionally configured 60s series models.

Built On Sound

Acoustic Guitars

Forte Exotic JE

When you first lay eyes on the Forte Exotic JE you can not help but notice the striking appearance. That is thanks to the Java Ebony top. The styling is enhanced thanks to a bold satin black finish on the Okoume back and sides and the addition of black binding and hardware. The sonic performance is just as striking as the Forte Exotic's look. These woods combine to give you a full-bodied

rich and deep tone. We further improve that performance via our Port Technology which positions the soundhole off center and opens up a larger soundboard. Want to plug it in? No problem. The Forte Exotic JE includes a complete Fishman electronics system with an under saddle pickup. The Forte Exotic JE is a great instrument and value, check out all of the details below.

Java Ebony Finish

*00348016..... MSRP \$519.99 • MAP \$349.99

Forte Port

The Forte Port features Michael Kelly's Port Technology. This fresh new approach to top bracing and soundhole placement results in a noticeable improvement in sonic performance. It is dynamic, responsive and has a big bold sound. The Forte Port features an aggressive cutaway giving you more fingerboard access and great balance. The Forte Port is equipped with an active Fishman Presys electronics system.

The under saddle bridge pickup captures the full and natural sound of the Forte.

Natural Finish

*00348017..... MSRP \$489.99 • MAP \$299.99

Forte Port X

The Forte Port X starts with the Michael Kelly Port Technology. This fine-tuned combination of bracing and an offset soundhole placement works great with this all quilt maple body. Available in two distinctive colors. Easily amplify your Port X thanks to the included active Fishman electronics and the under saddle bridge pickup captures the full and natural sound of the Forte Port X.

Natural Finish

Forte Port 12 – Randy Jackson of Zebra Signature

12-String Acoustic/
Electric Guitar with
Fishman Electronics

The Forte Port 12 builds on the design and innovative technology of Forte Port acoustic guitars. This visually striking guitar combines exotic ziricote wood with a natural gloss finish. The styling is further enhanced with mother-of-pearl inlays that adorn the ovangkol fingerboard, including

the Forte Celtic knot and black diecast tuners. The sonic performance is just as striking as its look. The offset sound hole creates a larger resonant area under the strings for improved depth, accuracy and tone. The Forte Port side-mounted soundhole produces superior tone and clarity and allows you to hear sound coming directly from the body of the instrument for easy monitoring. Want to go electric? No problem. The Forte Port 12 features Fishman electronics to capture the full and natural sound of the guitar. The active electronics include volume, contour and phase controls along with a built in tuner.

Gloss Ziricote Finish

*00362617..... MSRP \$759.99 • MAP \$519.99

Triad Port

The Triad Port has a bold new look, but it is much more. This offset soundhole placement was designed to create a larger resonate surface on the guitars' tops. The Michael Kelly craftsmen then tuned the bracing, side soundholes and top to optimize this design. You are going to love the way this sounds. The Triad Port is equipped with an active Fishman electronics system. The under saddle bridge pickup captures the full and natural sound of this great instrument.

Natural Finish

MSRP \$1159.99
MAP \$799.99

Built On Sound

Hybrid Special

The Hybrid Special allows you to quickly switch from powerful electric guitar tones to big acoustic guitar sounds with the flip of the switch. Thin and lightweight, the chambered semi-hollow body provides acoustic resonance while producing a sweet, clear tone.

Two custom voiced Rockfield SWC humbucker pickups with coil splitting allow the guitar to deliver everything from super clean twang tones to thick drippy drive sounds. A Fishman® under-saddle pickup with Fishman® Powerchip delivers a rich acoustic tone. The electric and acoustic signals are combined when using a standard guitar cable, or separated via a Y-cable to deliver isolated signals to electric or acoustic amplifiers for maximum sonic impact.

Mandolin

Legacy Dragonfly Flame Electric

Take the stage, leave the microphone behind. The Legacy Dragonfly Flame E is built for the stage. The integrated Fishman system is specially voiced for this mandolin. The pickup is built into the bridge and the side-mounted controls allow you to tweak the tone and even includes a tuner. This mandolin captures and amplifies what you

play - each chord, percussive note, and chop - all without the challenges of having a live microphone on stage. The Legacy Dragonfly Flame E has been a best seller for over 15 years for a reason. The pickup system is built into a carefully crafted quality instrument. The top is hand carved from solid spruce, the back and sides are solid flame maple. We radius the fingerboard and bridge to make it more comfortable to play and have upgraded the fingerboard, tuner, and bridge all to give you the great f-style mandolin that you are looking for.

Custom Collection Element 5R Electric

The Custom Collection Element 5R bass is an upgraded version of the standard Custom Collection bass guitars, featuring a Roasted Maple neck and head, Pau Ferro fretboard, and a striking Buckeye Burl top over the lightweight Indonesian Mahogany body. You will see that we used a solid molded bridge with tight slots for each fully-adjustable saddle, a big enhancement on its own. Under that bridge is an aluminum tone block. We add

that hidden block to add sustain and attack. Since it is aluminum, it does not add weight to the bass, but has a similar sonic impact to using a heavy bridge.

Burl Finish

*00348024..... MSRP \$1089.99 • MAP \$699.99

Element Electric

With Open Pore Maple Fretboard

Element OP 4-string and 5-string bass guitars are designed with modern bass player in mind, with features that will make them "go to" instruments for players of all levels. Boasting a striking look, the Element OP basses have an open pore finish that preserves the natural acoustic properties of the exotic sungkai wood body, resulting in a wider range of sustained frequencies and a stellar tone. The maple neck and fingerboard provide a tight low end with a solid bite.

Sojourn Port Acoustic Travel

The design, tone, and features mean this is a gig-ready acoustic bass. The Koa body is beautiful, it is so much more than good looks! We selected it for the tone and projection that we were able to achieve in this unique model. The 24.75 inch scale length makes this instrument fun to play and allows each string to perform well. One challenge with many travel basses is that they are hard to hear because of the way lower frequencies

project. We overcame this on the Sojourn Port travel bass in two ways. When you play acoustically you will notice the massive benefit of the small port that we added to the side of the bass. This is positioned to point directly at the player, acting like a personal monitor. When you want to play in louder situations you can utilize the integrated Fishman electronics system. We selected the Fishman Presys II, which includes onboard bass and treble controls to allow you to dial-in your tone.

Gloss Koa Finish

Warm Audio

Foxy Tone Box Guitar Pedal

Model WA-FTP

The new Foxy Tone Box from Warm Audio is a hyper-accurate recreation of one of the most sought-after and beloved fuzz pedals of all time – used in the early seventies by legendary tone masters Billy Gibbons and Peter Frampton, and in the present day by folks like Adrian Belew, Nine Inch Nails and Beck. Covered in thick velvet just like the vintage pedal, the Warm Audio Foxy Tone Box faithfully recreates the vintage circuit and brings you the huge tone, octave-up sounds and look of the original...without having to pay crazy vintage prices!

00354922..... MSRP/MAP \$149.00

Jet Phaser Guitar Pedal

Model WA-JP

The seventies were an amazing time, as bell-bottoms, chains and afros dominated the fashion scene and the swoosh and swirl of phaser effects were everywhere on the radio. From the guitar work of David Gilmour, Brian May and Eddie Van Halen to the trail-blazing keyboard stylings of Steely Dan, Herbie Hancock and Paul Simon's Richard Tee, it seemed like everyone was incorporating phasers into their sound. The Warm Audio Jet Phaser is a hyper-authentic recreation of this famous pedal, accurate from the goey swirl of the audio circuit to the look and feel of the enclosure, except that it's true bypass and far more affordable and reliable than vintage units!

00354921..... MSRP/MAP \$199.00

Morley Pedals

Morley 20/20 Series Pedals

- Switchless Wah activation, simply step on to activate and step off to bypass
- Acclaimed optical circuitry that won't wear down or get scratchy over time

Singular Sound

BeatBuddy Pedal

The First Guitar Pedal Drum Machine

BeatBuddy is the first drum machine in a guitar pedal format that enables full hands-free, creative control of the beat. Musicians can effortlessly insert fills, transition from verse to chorus, add accent hits, throw in drum breaks, and more, to create an unprecedented live drummer effect – all in award-winning, ultra-realistic 24-bit sound. The non-quantized beats, recordings of real drummers, makes BeatBuddy the first drum machine to not sound like a machine. No programming is necessary. Over 200 songs in 21 genres (each playable by 10 hyper-realistic drum sets) are available right out of the box. Just cue your drummer and start jamming. Infinitely more content: Download more songs and drum sets from our ever-expanding Premium Content Library, create your own content with the included PC/Mac software, or discover and share new material on the BeatBuddy Community Forum. BeatBuddy is packed with features for musicians from all walks of life. A visual display of the beat makes it easy to improve rhythm or learn new time signatures. MIDI Sync controls your loopers to make sure they're in time with the beat. Record directly from the BeatBuddy for professional-level drums on your upcoming album. Create gig lists and scroll through your songs, hands-free, during your next performance. It's the power of a drum machine with the simplicity of a pedal.

Aeros Loop Studio

Featuring the ability to create 36 unique loops per song, add unlimited over-

dubs for each loop, and record up to 48 hours (when using an SD card), the Aeros Loop Studio goes beyond what's expected of a looper pedal. Blurring the lines between traditional loopers and audio workstations, the Aeros allows you to mix your tracks live during a performance using the built-in scroll wheel, and gives the ability to save and export songs. This will let you share your best loops with your fans. With its 4.3-inch touch-enabled screen and color-coded cues and waveforms, the Aeros looper will never leave you wondering where you are in the loop. Additionally, the Aeros packs tons of power into a small form factor. Coming in at just 7.8-inches x 5.6-inches (198x142mm), the Aeros lets you add a 6 track, stereo looper to any pedalboard. Of course, the Aeros is fully compatible with the BeatBuddy. Using the two together is a plug and play experience. The Aeros looper pedal also features bluetooth and wifi, enabling exciting new features with over the air updates. Simply put, there's no pedal that can match the Aeros Loop Studio!

Gemstone Series (NEW!)

Gemstone hues available:

Amber Ukuleles

Colors forged from the beginnings of time.

Deep oranges and brown. Timeless shades that convey an age-old sound and wisdom that is as beautiful today as it was way back then.

Coral Ukuleles

The color of mystery and an unexplored world!

Where tunes and sounds like newfound species make their way out of the coral of imagination. This instrument will inspire as much as it will enthrall you and all those who hear it.

Jade Ukuleles

Green is the color of our planet's lungs. Breathing musical life into your immediate

atmosphere. Green is the color of envy when others look at this delicious instrument. As intimate as a quiet forest or as open as the Savannah, this uke is an instrument you won't want far from your side.

Topaz Ukuleles

The color of the sea and the color of your soul. This ukulele sings and

sends you on a journey up and down the entirety of the fret board like a seasoned explorer.

Sapele Soprano Ukuleles

Model NUS380

We have packed this beauty into a soprano size to compress and focus the best assets of this instrument. The sapele wood brings out the percussive punch of a soprano uke. With the striking amber colors concentrated into this small gem, you won't want to put it down.

Mahogany Concert Ukuleles

Model DUC380

This ukulele is a concert size instrument, which means you can strum or finger pick with ease and let it sing. There's a reason why many people buy concerts and that is the happy medium it brings between devoted strummers of the soprano and Hawaiian finger pickers. This instrument has the tools and wisdom to do both.

Mahogany Electro-Acoustic Concert Ukuleles

Model DUC380 CEQ

The concert size brings the best of both worlds into one instrument. The mahogany makes this uke sing like a soprano, but the scale length and cutaway means you have the same scope of exploration as a tenor uke. Add into the mix, a pickup, you have a ukulele that you can play on your own or to a crowd.

Elise Ecklund Sunset Signature Ukuleles

There's something truly magical about a sunset. No matter where you are in the world, you can admire the beautiful colors streamed across the sky. The times I have watched a sunset over the mountains, I've felt adventurous, free, inspired, and a sense of peace. I wanted to capture this feeling on a ukulele. This soprano travel uke is for music lovers of every level, whether you are just starting out or have been playing for years. Pick it up and take it on every adventure with you.

– Elise Ecklund

Soprano Ukulele with Long Neck

Model TUSL-EE

Thanks to a wider arched ABS back, this baby has more volume in middle range than your average soprano, while also resonating better and sounding brighter. Linden is a wood characterized by a bright sound and

sleek texture. It also absorbs water colors in a very interesting way creating very cool patterns, which means that no uke is the same and your uke will be the one and only. On top of that, Flight is using a special wiping color technique to create even more patterns. The neck surface imitates the wood pattern, to avoid a feeling of cheap plastic.

00346420..... MSRP/MAP \$69.99

Ukulele Bundle

This bundle includes the Elise Ecklund Sunset Travel Ukulele, Elise Ecklund strap, Elise Ecklund capo, gig bag, and the Elise Ecklund Songbook.

00324390 MSRP/MAP \$99.99

U Can Uke Signature Ukulele

Concert-Scale Ukulele
Model TUC-UCU

Designed by YouTube Personality Matt from U Can Uke, the TUC-UCU features a desert scene on the soundboard, with the UCU logo on the headstock. Like all Flight Travel Ukuleles, the TUC-UCU offers great sound, playability, durability, and value. Flight Concert Travel Ukuleles (TUC) have a slightly larger body and

a slightly longer fretboard than the Soprano Travel Ukulele, resulting in a larger sound—all the great qualities of the TUS, but bigger. Players with larger hands will enjoy the extra room on the fretboard. The TUC-UCU Concert Travel Ukulele includes a linden wood top with an ABS body, neck, fretboard and bridge. The result is a ukulele with low action that is easy to clean and maintain.

00350672..... MSRP/MAP \$74.99

Blue Kids

Soprano Ukulele with Concert Neck

Model TUSL-KIDZ

The Flight Travel Ukulele is the ideal ukulele for use in the school environment as they are tough, can be cleaned, and are not susceptible to sharp fret ends or changes in humidity. Most important, they play great and sound great.

This instrument was specifically outfitted for use in school settings. The strings used on the

ukulele are Aquila Kids Strings which were developed to help teachers teach and students learn the ukulele. There are a number of resources, many free, which utilize the color system of these strings. On top of it all, the KIDZ ukulele includes an extra set of Aquila Kids Strings which will help schools dealing with tough budgets, and a specially designed start-up booklet.

00359136 MSRP/MAP \$53.99

Mandala

The Mandala Wood Travel Ukulele is so special that it will always hold a special place in your heart. The mandala wood design points back to the geometric art of Eastern Spiritualism which helps the practitioner focus and create a sacred

space around them.

00354340 MSRP/MAP \$54.99

Space

This ukulele features a galaxy of stars on its soundboard and headstock. This is the perfect instrument to strum around a campfire or to play under the starlit sky. The laminate basswood soundboard of the ukulele is punchy,

resonant, and loud.

00347357 MSRP/MAP \$54.99

Electro-Acoustic Ukulele

Model 6015

Mango Wood Tenor Ukulele

Fireball EQ-A Ukulele

The Flight Fireball is named after a well-known jet airplane. The Flight Fireball EQ-A Tenor features a solid mango body with dyed maple appointments, including a rosette, comfort edge, and scalloped cutaway. The mango tree, most popular for its tasty fruit, also serves as a stunning tone wood, both in appearance and sound. Mango has a sweet sound (pun intended) that is often compared to koa, while offering amazing grain patterns found with no other tone wood. Check out the amazing Flight Fireball and see how sweet it is to fall in love with it!

00360262 Model 6015 MSRP/MAP \$629.99

Model TUS-50

Soprano Ukulele with Concert Scale

Salamander

Our well-established TUS-50 proves that it gives a sound to bowl you over. We've added a concert scale to the soprano body so that when you're away from home, you have the comfort sustain and depth of a concert-sized fretboard and the

punch and percussiveness of the soprano.

00322864 MSRP/MAP \$54.99

Model TUS-53

Soprano Ukulele

Mahogany

The Mahogany Soprano Travel Ukulele features a laminate mahogany top which will respond to any playing style and add a traditional "look" while doing so. Mahogany is the timeless darling of all ukulele luthiers worldwide. It

is strong and full of rich tone and volume making it the king of tone woods.

00354341 MSRP/MAP \$54.99

Model TUS-55

Soprano Ukulele

These soprano ukuleles features a laminate top which will respond to any playing style and add a traditional "look" while doing so.

Acacia

Acacia is in the same family as koa, featuring bright tones, lots of punch, and plenty of sustain. The Acacia Soprano Travel Ukulele looks simple and clean, and you will love the sound it produces.

00354342 MSRP/MAP \$59.99

Amara

Amara is an ebony full of darkness and exciting grains, and has a deep, mysterious sound with good volume. This uke will help you discover the layers of your talent!

00354344 MSRP/MAP \$59.99

Mango

Mango is a popular material as much for how it looks as well as how it sounds. It offers a bright clear tone, and the light and dark grain of the Mango will have you staring at it as much as you play it. Mango often grows in groves around water so this ukulele will feel right at home when you're playing with waves lapping at your feet.

00354343 Model TUS55 MSRP/MAP \$59.99

Flight

Ukulele Straps

Model S35

These straps adjust in length and feature high quality leather strap ends and a leather tie-back. Flight wants you to be able to focus on being the best musician you can be, and a strap can help you with that process. Ukulele straps look great, offer peace of mind, provide comfort, and liberate your chording hand to be able to move up and own the neck without worrying about how to hold and support your ukulele.

Arcana Ukulele Strap

A unique ukulele strap to match our TUS-40 Arcana Travel ukulele. The design of this strap will make your audience

look twice. The unusual geometric pattern creates a three-dimensional look. If you like optical illusions and graphic art – this is the strap for you!

Essentials Series

The Essentials line of cables provides a highly affordable entry into the world of Cordial's True to the Source(TM) audio with a wide range of professional products at decidedly musician-friendly prices. The secret? Cordial's engineering, designs, and attention to quality and detail are cost-reduced via offshore manufacturing and the use of Neutrik REAN® plugs. Like their German counterparts, Essentials products use Cordial's 99.99% pure virgin (non-recycled) oxygen-free copper and are manufactured to exacting specifications.

Features include:

- 99.99% Oxygen-Free (OFC) non-recycled copper for purest, most dynamic signal
- 24-gauge multi-stranded center cores for flexibility and long life
- Low capacitance/low resistance design for True to the Source(TM) performance
- High-Density spiral shield provides exceptional protection from RF interference
- REAN (by Neutrik) connectors deliver superior fit and durability
- Hand-soldered to guarantee optimum signal connection
- Kink-free flexible outer sleeve
- Designed and manufactured to the exacting standards Cordial is known for worldwide
- Built-to-last quality
- Lifetime E-Z Swap Warranty (5 Years on Stage Multi-Snakes). See www.cordialcablesusa.com for details

Select Series

The Select Series is a robust, high-performance series suitable for a broad range of applications, including studio, live performance, rehearsal halls, rentals, and more. Designed to last a

lifetime (and warrantied to do so), Select series cables take a no-nonsense approach to design, pairing time-proven cabling drawn from Cordial's German-designed and manufactured premium bulk lines with hand-soldered Neutrik® connectors. The result: Cables that deliver top-level performance with reliability you can count on day in and day out – even under demanding conditions.

Features include:

- 99.99% pure virgin oxygen-free copper core and shield for superior signal transmission
- High-density copper shield for optimum noise rejection
- Noise-eliminating core sleeve
- Ultra-low capacitance/low resistance
- Hand-soldered Neutrik® connectors
- Retail pricing typically 30%-40% lower than other premium cable brands
- Lifetime EZ-Swap Limited Warranty

iLoud Micro Monitor

iLoud Micro Monitor is a full-featured ultra-compact stereo reference monitoring system. It's a pair of

portable studio monitors with a professional-quality bi-amplified design that provides a true and accurate sound with a true linear frequency response. iLoud Micro Monitor is powered by four ultra efficient class D power amps that deliver a combined 50W RMS of power. Each offer extreme clarity and superior bass response via two 3/4" tweeters and two 3" woofers. These features are augmented by an on-board 56-bit DSP processor. It gives you total control of the monitor's performance, allowing for stunningly accurate and detailed sound for mixing in small spaces without the typical compromises of small monitors.

iLoud Micro Monitor can be adjusted to suit different playback situations thanks to its two positionable angles of inclination and three dedicated EQ switches: bass, treble and a "free field"/"desktop" compensation switch. These switches let you optimize its sound for your listening environment. It also comes with a full range of source options that includes Bluetooth streaming as well as RCA and 1/8" inputs. iLoud Micro Monitor is perfect for mixing, mastering, composing, producing, critically listening and more in a wide variety of situations both while traveling and while at home or in the studio.
