Joan Boytim's unique book, by now a modern classic, was first published in 2003. The revised edition addresses many of the changes in our lives and in the profession of teaching voice in the last decade. Most chapters have been expanded with added and updated information, and with additional student case studies. *The Private Voice Studio Handbook* remains the only widely used book written from the practical point of view of a veteran voice teacher, addressing all aspects, from location and decisions about a teaching studio, to policies and fees, auditioning students, student recommendations, competitions, teaching adults, taxes and running an independent business, repertoire, vocal technique, ethics in studio teaching, teaching music reading through syllable exercises, inspirational thoughts, and so much more.

MUSICAL THEATRE FOR CLASSICAL SINGERS

edited by Richard Walters
with plot notes on each song and show
available with recorded piano accompaniments

This is the landmark, must-have musical theatre “aria collection” for classical singers! Songs have been carefully chosen, especially suited to the classical voice. The editions treat the music as substantial vocal literature, with insightful editorial suggestions for optional high notes in appropriate spots. Each voice type has a wide variety of literature, from the operetta period on Broadway, to classic musicals, to more contemporary fare. The series presents primarily original keys, but there are also appropriate and practical transpositions in some instances, particularly for mezzo-soprano.

THE SINGER'S ANTHOLOGY OF AMERICAN STANDARDS

compiled and edited by Richard Walters
Hal Leonard

NEW

Some of the most famous and enduring songs from "the great American songbook" have been selected and edited especially for singers in this landmark series, with songs from George & Ira Gershwin, Richard Rodgers & Lorenz Hart, Jerome Kern, Cole Porter, Irving Berlin and many others. The music is from the 1920s to the early 1960s, in a musical style that pre-dates the rock era. The majority of the songs appear in all four volumes, though some songs are uniquely in the women's volumes or men's volumes. Unlike standard piano/vocal sheet music, the edition does not have the melody in the piano accompaniment, which gives the singer more vocal freedom. Keys have been carefully chosen for each voice type. Each volume also includes a historical note about each song, often citing recording artists who became associated with a particular song.

Hal Leonard Listening Library – Children's Vocal

HOW TO USE HAL LEONARD ONLINE AUDIO

Because of the changing use of media, and the fact that fewer people are using CDs, we have made a shift to companion audio accessible online. In many cases, rather than a book with CD, we now have a book with an access code for online audio, including performances, accompaniments or diction lessons. Each book has a unique access code. We call this Hal Leonard created system “My Library.” It’s simple to use.

Go to www.halleonard.com/mylibrary and enter the unique access code found on the first page of a relevant book/audio package.

The audio tracks can be streamed or downloaded. If you download the tracks on your computer, you can add the files to a CD or to your digital music library, and use them anywhere without being online. See

below for comments about Apple and Android mobile devices.

There are some great benefits to the My Library system. **Playback+** is exclusive to Hal Leonard, and when connected to the internet with this multi-functional audio player you can:

- Change tempo without changing pitch
- Transpose to any key

Optionally, you can create a My Library account, and store all the companion audio you have purchased there. Access your account online at any time, from any device, by logging into your account at www.halleonard.com/mylibrary. Technical help may be found at www.halleonard.com/mylibrary/help/

Apple/iOS

Question: On my iPad and iPhone, the Download links just open another browser tab and play the track. How come this doesn't really download?

Answer: The Safari iOS browser will not allow you to download audio files directly in iTunes or other apps. There are several ways to work around this:

- You can download normally on your desktop computer, saving the files to iTunes. Then, you can sync your iOS device directly to your computer, or sync your iTunes content using an iCloud account.
- There are many third-party apps which allow you to download files from websites into the app's own file manager for easy retrieval and playback.

Android

Files are always downloaded to the same location, which is a folder usually called “Downloads” (this may vary slightly depending on what browser is used (Chrome, Firefox, etc)). Chrome uses a system app called “Downloads” where files can be accessed at any time. Firefox and some other browsers store downloaded files within a “Downloads” folder in the browser itself.

Recently-downloaded files can be accessed from the Notification bar; swiping down will show the downloaded files as a new “card”, which you tap on to open. Opening a file depends on what apps are installed on the Android device. Audio files are opened in the device's default audio app. If a file type does not have a default app assigned to it, the Android system alerts the user.
